

Guidelines for abstract submission for ILF Conferences

The following guidance is intended to help those submitting abstracts to present them in a clear and concise framework to facilitate assessment by the Conference Scientific Committee. It is recognised that some papers may not fit the structure exactly, so some flexibility is appropriate. While recognising there is limited space, it would be useful to include one or two key references in the abstract. Where appropriate, results (even preliminary) should be included.

Clinical research studies (indicating if quantitative or qualitative)

These should include:

- Introduction / background
- Aims of study
- Methods (including statistics, whether ethics committee approval has been given)
- Results
- Conclusions, i.e. what does the study add to existing knowledge Studies should preferably be completed before presentation at the conference.

Clinical audits

These should include:

- Introduction
- Aim of audit
- Standards being audited
- Methods
- Results
- Conclusions, i.e. in relation to any changes in practice or revision of standards

There should also be confirmation that approval was granted by an appropriate committee.

Case reports

These should include:

- Describe original / rare cases
- Reason for report
- Cases(s) description (confirm consent)
- Discussion e.g. compare with previous reports; implications for practice.

Service development / enhancement initiatives

These should include:

- Aims
- Description
- Evaluation, indicating any patient involvement
